

Parents will:

1. Have fun learning songs, stories and rhymes with their toddler.
2. Learn ways to help their child's communication skills.
3. Get an understanding of their child's communication style and abilities.
4. See how play time is important to their child's communication skills.

Mother Goose Toddler Talk

For toddlers
ages 18 to 36 months

A fun program to help you
and your toddler with
speech development

Mother Goose Toddler Talk

helps parents find different ways
for their child to communicate
by using songs, rhymes, signs and stories.

This program is for parents of toddlers
that have been referred to the
Infant Development or Speech Programs

What happens at Mother Goose?

- ♦ Families meet with a Speech-Language Pathologist and an Infant Development Consultant once a week.
- ♦ You will have a relaxed and fun hour of learning, listening, laughing and playing
- ♦ We will show you and your toddler some fun action rhymes and songs.
- ♦ We will tell stories and you can practice what you have learned.

What are the Benefits?

Learning how to talk is not as easy as it seems! A toddler who can talk or speak well and tell their wants and needs will:

- feel secure, more confident, and independent
- use more words to tell you their needs, interests and feelings
- be less frustrated, because they are able to communicate things which are important to them
- develop their social skills
